Report for domain it.tuwien.ac.at

Nmap report

This is the result of the Nmap activity. **Here you can find only the relevant information**

Joomscan report

This is the result of the Joomscan activity. Here you can find only the relevant information Remeber: **when the text is red, something interesting is found**

Nikto report

This is the result of the Nikto activity. Here you can find only the relevant information
Remeber: **some discoveries could be false positive, since nikto checks the response code for some vulnerabilities -> example XSS**

Nuclei report

This is the result of the Nuclei activity. Here you can find only the relevant information

Remember:

- **Green is used for low impact vulnerabilities**
- **Orange is used for medium impact vulnerabilities**
- **Red is used for high impact vulnerabilities**

Dirb report

This is the result of the Dirb activity. Here you can find only the relevant information
Remeber: **Only responses with code 200 are reported here**
